NAIF

Northern Australia Infrastructure Facility

Investing for impact in northern Australia

The Northern Australia Infrastructure Facility (NAIF) is a Commonwealth Government entity established to facilitate economic and population growth in northern Australia through financing infrastructure projects and helping to catalyse private sector investment.

NAIF partners with proponents in a broad range of industry sectors investing in northern Australia by:

- Facilitating the growth of northern Australia;
- Accelerating projects;
- Delivering public benefit;
- Catalysing and crowding in private sector investment;
- Ensuring strong indigenous opportunities and outcomes.

Our Process

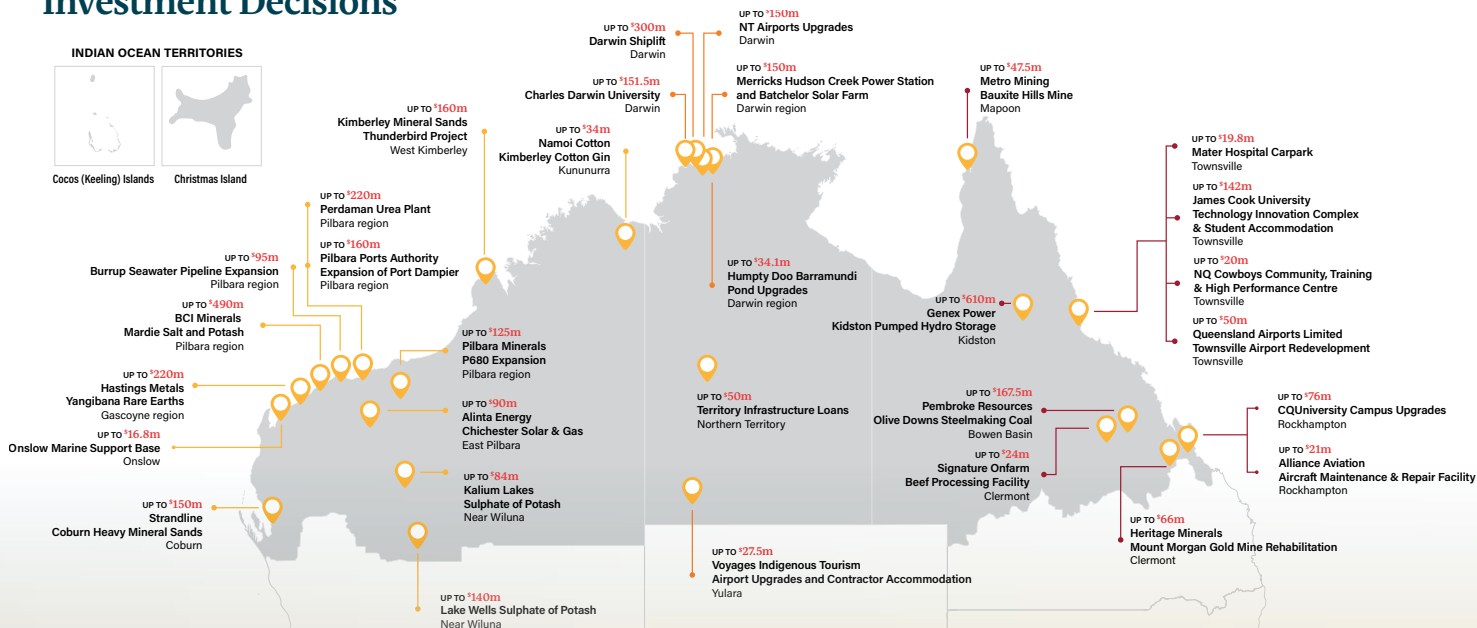

Australian Government

NAIF

Northern Australia Infrastructure Facility

Our team of experienced professionals work closely with clients to understand their needs and tailor financial solutions that meet their specific requirements. NAIF is committed to helping infrastructure projects deliver long-term benefits for the region and its communities.

Investment Decisions

Pilbara Minerals P680 Expansion, Gascoyne region, Western Australia

Indigenous Engagement

All proponents applying for NAIF financing are required to develop an Indigenous Engagement Strategy (IES) which set out objectives for Indigenous participation, procurement and employment.

Our helpful Indigenous Outcomes team work with the proponent, Traditional Owners, Land Councils, State and Territory Government and Indigenous business, training and workforce groups to establish culturally appropriate training pathways, employment opportunities and procurement strategies that are tailored to the aspirations of the local community.
